**DETAILED ACTION**

**Status of Application**

1. The request filed on 11/20/02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/403,224 is acceptable and a CPA has been established. An action on the CPA follows.

2. Applicant specifically requested in a preliminary amendment that if the newly added claims were considered to be a separate invention, that claims to the process and product-by-process be examined. However, the product-by-process claims are a different invention than the process claims and are grouped with the previously examined product claims. As requested, the Examiner placed calls to Ms. Kecia Reynolds but did not result in a clarification of the election.

**Restriction Requirement**

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 7 and 11-12, drawn to a fluororubber composition, classified in class 525, subclass 276.
- II. Claims 9-10, drawn to a process for curing a fluororubber composition, classified in class 525, subclass 263.

4. The inventions are distinct, each from the other because:

5. Inventions of Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as using both primary and secondary curing.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and/or have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1713

***Conclusion to Restriction***

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. A telephone call was made to Ms. Kecia Reynolds on 1/3, 8 & 10/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
